## Gorilla Treestands HX Series Hang-On Treestands

Gorilla (810-733-6360; [www.gorillatreestands.com](http://www.gorillatreestands.com)) has completely redesigned its treestands. HX Series hang-on stands are all-welded steel rated to 300 pounds with new zero-G seats 20-21 inches above 24x30 platforms, adjustable backpack straps and distinctive hex-platform styling, flip-up seats and black non-glare finish with Mossy Oak. The 21.5 lb. double post King Kong Lounger HX includes padded back and armrests with a footrest, in either platform- or hammock-style seats. Whereas the single post King Kong HX (18.5 lb) has the 24x30 platform, the 15 lb Kong HX has a mid-size 21x27 platform. (Three new Silverback HX single post stands are aluminum with platforms in three sizes.)

## All-Steel Ladder Stands

New all-steel ladder stands from Gorilla are non-reflective black with Mossy Oak accents. The two-person 16-foot Wrap Around (127 lbs., rated to 500 lbs.) has independent seats with footrests, armrests and adjustable, padded, removable shooting rail. Four dual-rail ladder sections support its huge 64x36 platform. The 20-foot High-N-Tight, rated to 300 lbs., weighs 64 lbs. with a folding, locking 25x17 platform, folding seat and "step-outs" that allow safe, easy entry and exit. The 20-foot Big Fella uses multiple stabilizing bars and has a footrest, padded back, armrests and removable padded shooting rail; rated to 300 lbs. with a 26x20 platform.
